SUMMARY

Final-year B.Tech CSE (AI & ML) student at SRM IST Trichy with a **9.5 CGPA**, concurrently pursuing a **B.S. in Data Science from IIT Madras**, with hands-on experience across **full-stack development, AI-driven systems, and cross-functional team delivery**. Demonstrated ability to deliver production-ready software under tight deadlines, collaborate across diverse teams, and adapt rapidly to new technology stacks — evidenced through two independent end-to-end projects and a frontend SDE internship. Open to relocation and cross-technology roles as required.

EDUCATION

SRM Institute of Science and Technology, Trichy <i>B.Tech in CSE — Artificial Intelligence & Machine Learning</i>	2023 – 2027 CGPA: 9.5
Indian Institute of Technology, Madras <i>B.S. in Data Science and Applications: Diploma Level (concurrent with B.Tech)</i>	2024 – present

EXPERIENCE

PurpleDocs - Software Development Engineer Intern <i>Remote - Frontend Development</i>	Jun. 2025 – Jul. 2025
--	------------------------------

- **Built the complete frontend** for a Hospital Management System from scratch using **React and HTML CSS**, translating Postman API specifications into a React + HTML CSS SPA covering patient registration, appointment scheduling and admin dashboards.
- Consumed **20+ secured REST API endpoints** with JWT-based auth headers, handling real-time data rendering, loading states, and error boundaries to maintain patient data integrity on the client side.
- **Reduced administrative workflow steps** through reusable component design and dynamic data-visualisation dashboards, improving staff efficiency across modules.

NeuroTech Titans (AI/ML Club) — Vice President <i>SRM IST, Trichy</i>	Jun. 2024 – Oct. 2024
---	------------------------------

- **Coordinated 4 technical events** and **mentored 30+ junior members** on ML fundamentals and project ideation, growing active club membership by **40%**.

PROJECTS

Lucy Security Fabric — IoT Intrusion Detection System & Network Security Controller <i>(TensorFlow, Keras, Flask, SQLAlchemy, Raspberry Pi)</i>	
---	--

- Engineered an unsupervised Autoencoder-based IDS with a 5-neuron latent space and L1 activity regularization, trained on NSL-KDD normal traffic using a reconstruction-error threshold of $\mu + 2\sigma$.
- Developed a full-stack network security dashboard with 20+ management panels, including live system metrics, UFW policy management, Snort 3 IPS, ClamAV integration, DNS ad-blocking, VPN monitoring, and role-based access control.
- Deployed the application as a **systemd** service on Raspberry Pi OS with automated IP blocking through UFW subprocess calls, enabling end-to-end threat detection and response.

Plateau — Recruitment & Placement Management System	<i>(Flask, HTML, CSS, SQLite, Jinja2)</i>
--	---

- Built a full-stack placement management platform with three role-based dashboards (Admin, Company, Student), each enforcing distinct permissions and workflows.
- Designed a relational database schema linking companies, placement drives, and student applications, supporting application status transitions and administrative moderation controls.
- Developed student-facing features for searching and applying to placement drives with application status tracking, alongside company dashboards for posting drives and managing candidate pipelines.

SKILLS

Languages: Python, SQL, OOP

Frontend: HTML, CSS, React, Jinja2, Axios

Backend & Data: Flask, FastAPI, SQLAlchemy, Redis, SQLite, PostgreSQL

AI / ML: Scikit-learn, Pandas, NumPy, Prompt Engineering

DevOps & Tools: Linux, Docker, Git

ACHIEVEMENTS / CERTIFICATIONS

- **Best SDG Impact Award — TENSOR'26:** Zero Framework ranked **5th** among 80 competing teams; recognized for SDG 9 and SDG 11 alignment and demonstrated superior secret detection and IaC coverage versus SonarQube across benchmarked codebases.
- **Certifications:** AWS Cloud Computing 101 | DeepLearning.AI TensorFlow Developer Professional Certificate | Oracle Cloud Infrastructure (OCI) AI Foundations Associate | Introduction to MongoDB for Students
